- How effective are your organization's privacy awareness and training programs?
- How long has your program been in place?
- Who needs another programming language?
- How quickly are typical programs stood up?
- What features of the program made a difference?
- What does an effective third-party program look like?
- Are the expectations realistic in effectively reducing program risk to an acceptable level?
- What categories of contingent talent are you integrating into your program?
- What is percentage of IT occupational spend going through your program?
- How do you get executive support for your privacy program?
- What regulations do you strive to comply with as part of your GRC program?
- Is there a physical security program?

- Is there a dedicated, reliable support team available for your program?
- What model does your organization use for its TPRM program?
- Does the internal audit program assure appropriate corrective action?
- Will suppliers commit to a program implementation schedule?
- Have you conducted testing of the program's effectiveness?
- What does a data privacy program look like?
- Do you have an employee security awareness training program?
- How is an inspection program created?
- What are customer challenges to implementing and executing a third-party assurance program?
- Is the third-party offering a continuity program or membership?
- What do other jurisdictions programs look like?
- What is the scope of your TPRM program?
- How would you rate the maturity level of your current TPRM program?
- Do you have a designated senior-level individual who is responsible for your organization's HIPAA privacy program?
- What are the hard and soft cost savings you are hoping to achieve with the program?
- Do you know how your program will be structured, including its benefits, challenges, and risks?
- What are the current and future initiatives for your program?
- How mature is your ITAM program?
- Is your information security program on the level?
- What programming language or languages should be supported?
- Can a nonprogrammer develop a new business process in the system?
- How do employee BMP training programs function?
- What is the goal of the program?
- What does customer service program look like?

- Does your organization have any plans to offer the training program to suppliers?
- Does the project have significant program or policy implications?
- Which function is responsible for managing your contingent workforce program?
- Do you see how to program a review?
- Are you loyal to loyalty programs?
- Does your organization also make a billing program that can be integrated with the EMR?
- Is your organization's compliance program well designed?
- What evidence do you have about security program practices?
- Did the program achieve its intended goals?
- How do you manage your TPRM program?
- Does your organization also make a scheduling program that can be integrated with the EMR?
- Do your key suppliers have assurance programs in place?
- How do you initiate procurement transformation programs to realize bimodal procurement?
- Is your quality program certified?
- Is market volatility the weak link in your insurance program?
- How does a program become successful?
- When and why was your SRM program created?
- How do you measure and sustain program ROI?
- How are projects linked in a program?
- What roadblocks still exist related to adoption of the program?
- How often is staff trained and informed about your organization's HIPAA policies and programs?
- What is a project and a program?
- Is time available to develop and implement the option, and what effect does that have on the overall program schedule?
- Does your organization have a documented training program?

- What drives the increased use of cooperative programs in public departments?
- Will program materials need to be in another language?
- Are programs needed for converting existing data files and databases?
- How is a recordkeeping and reporting program created?
- Did the program achieve targeted ROI?
- Are you confident in your incident response program related to third parties?
- What is the headcount required for the implementation of the production programme?
- How is internal audit involved in assessing the program?
- Does the service provider operate your organization's continuity program?
- What is the current status of your organization's third-party risk assessment programs?
- Does your organization have a formal contract risk compliance program?
- How does a preventive maintenance program function?
- Does the training program include all mechanics, inspectors, and technical supervisors?
- Has the program improved third-party relationships?
- Which products are covered under the program?
- How should the program be formatted?
- What is the scope of your current contingent workforce program?
- Will your solution support legislative changes that require immediate adjustments to the program?
- How will your organization know in the end if your program is a success?
- Will all of the systems be in scope for the bounty program?
- How can organizations successfully establish an SRM program?
- Is there a written training program?
- What is the annual spend going through your program?
- What are the specific goals for the program?

- Does your information security training program adequately cover security awareness?
- How does the rating scale align to the program's and your organization's risk rating scale?
- Does your organization support a program of governance?
- Is there a high level of intricacy or challenge associated with the program area or objective?
